Experience Summary

I'm a passionate Front-End Engineer with 5+ years of experience building secure, performant, and user-friendly web applications. I thrive in collaborative environments and have a proven track record of leading teams to deliver high-quality interfaces. My diverse background includes working with both Fintech startups and large-scale enterprises, giving me a well-rounded skill set for tackling both simple and complex projects.

Core Competencies

Front-End: Javascript(ES6+), Typescript, React JS, React Native, Next JS, Vue JS, HTML5, Redux, Redux Toolkit, RTK, Vuex, React Query, SWR, Zustand, Context API.

UI-Libraries: CSS3/SCSS/SASS, Tailwind CSS, Bootstrap, Material UI, Element UI Ant Design, GSAP, Framer Motion.

Others: Node JS, Express, GraphQL, Docker, Agile Methodology, Web Performance Optimization (WPO), SCRUM and Agile Methodology, DOM Manipulation, E2E Testing, FIGMA, Search Engine Optimization (SEO), Accessibility(a11y) and Internationalization(i18n), Cross-browser compatibility, PWAs, RESTFUL API, GIT, Azure DevOps Cloud , Jira, React Testing Library, Vitest, Jest.

Other Skills

Effective Communication, Emotional Intelligence, Growth Mindset, Collaboration, Mentoring, Critical Thinking, OwnerShip Mindset.

Professional Experience

Zenith Bank Plc | *Front-End Lead* | December 2021 – Present.

- Develop and manage user-facing web applications that serve over 2.4 million customers across E-business, retail banking, and credit card services, providing value to the business and its customers.
- Built and maintained both client-side and server-side web applications using React, Next JS, Vue JS and Typescript.
- Defined and enforced engineering best practices in projects to ensure that projects are delivered on time and with the best possible solutions, providing technical mentorship to fellow team members whenever possible to help the team and company grow rapidly.
- Worked on design, Front-End architecture and development of various revamped payment systems.

- Designed and built several new high-performance features for our service-based architecture. This included careful planning, testing, and performance optimization to ensure a smooth user experience. I also improved existing features to make them more efficient and user-friendly.
- Eliminated redundant application codes on old code bases that saved us about 20% of the size and the load time of every page bundle and build.

HTML5, CSS3, React JS, React Native, Next JS, Vue JS, Azure, Javascript(ES6+), Typescript, Ant Design, React Query, Zustand, Vitest, Jasmine, PWA, REST API, Redux, Tailwind, SWR.

Bulb – UK, | *Front-End Engineer* | August 2020 – October 2021.

- Responsible for end-to-end UI/UX development and implementation, including layout and product communication. Was focused primarily on front-end development for web applications, ensuring seamless user experiences and efficient interface functionality.
- Design and develop web applications, using React Js and Next JS framework, that are highly secure and scalable to meet the needs of the company's customers.
- Contributed to the development team that delivered a Customer Account Portal that provides customers with a convenient and secure platform to manage their energy accounts.
- Successfully shipped and deployed a Smart Meter Integration feature, reaching and benefiting millions of customers.

HTML5, CSS3, React JS, Next JS, Git, Tailwind, Javascript(ES6+), Docker, Typescript, React Native, React Testing Library, Jest, Material UI.

OPAY – Contract | *Software Developer* | July 2019 – August 2020.

- Worked on the development and maintenance of large-scale fin-tech software solutions ranging from Payment and Transaction Management, actively participating in the entire software lifecycle.
- Implemented robust and performant new features in a Service Oriented Architecture (SOA), profiling, planning, and testing features, and revamped existing ones.
- Was part of a team of skilled engineers that built an aggregator management application that boosted the efficiency of managing POS terminal activities for merchants.
- Liaised closely with product managers, designers and backend engineers to transform business requirements into software products for millions of customers.

HTML5, CSS3, Vue JS, Javascript, Typescript, React Js, Material UI, Git, Jest, Jasmine, Tailwind, Element UI.

Education

Bachelor of Science Computer Systems and Software | *African University of Technology and Management (GASA FORMATION).* | December 2017.
